TJÄNST**

TECHNOLOGY FOR LIFE

...is a Finnish NGO interested in
technology, its impacts and in redirecting
it.

**TECHNOLOGY CAN IN MANY WAYS
MAKE PEOPLE'S LIVES EASIER -
BUT CAN IT ALSO SOLVE THE
PROBLEMS IT HAS CAUSED?**

This requires a shift in the direction the whole
technology system is taking:

Our possibilities to influence technological
choices have to be increased. In research and
education, more attention has to be paid to the
enhancement of sustainable development. We
have to support people engaged in the field of
technology in their aspirations for ethical
responsibility at work.

In order to protect air, soil and water, pollution
must be diminished by developing norms,
standards and economic incentives. There is a
need to reduce the use of non-renewable natural
resources and to move towards recycling and
more efficient technologies and energy use.

Globally, military production has to be reduced
and the resources saved directed to satisfy
people's basic needs in developing countries and
to the mitigation of the effects of climate change.
We have to support the peaceful prevention of
crises in advance and to create conditions for a
lasting peace by paying attention to human safety
and global responsibility.

**JOIN!
TEP IS ACTIVE ...already since
1983!**

TEP WORKS in order to bring about the before-
mentioned changes and thus to have regard to
ethical principles also in practice.

TEP UNITES those interested in the use of
technology to discuss together, in learning more
about the impacts of technology upon the
environment and the society, in acting to promote
a more human and ecological technology and to
develop new alternatives.

TEP ORGANISES seminars and workshops on
technical education, technology policy,
development cooperation, technology assessment,
environmental policy etc. TEP works in
collaboration with other citizens' organisations
and professional associations. In order to further
its goals, TEP makes proposals to decision
makers. TEP participates in international
activities, in particular as an active member of
INES (International Network of Engineers and
Scientists for Global Responsibility). TEP
publishes a regular Newsletter and other
publications.

TEP CLUB is a discussion forum, where an expert
presents for discussion a topical subject
connected to technology.

ALSO ABROAD . . .

In development cooperation projects, TEP wants to improve the basic living and environmental conditions, as well as the situation of women in developing countries by promoting technology that utilizes local resources, is reliable and simple, and demands little capital and energy. The main emphasis is in education and educational facilities. The projects are licensed to collect contributions from the public.

License granted to: Tekniikka elämää palvelemaan – Tekniikan i livets tjänst ry

Granting authority: Southern Finland county government

License number: ESLH-2009-00834/Tu-52

Permission date: 4.2.2009

Collection period: 4.2.2009-31.1.2011

Collection area: the whole Finland, excluding Ahvenanmaa

The collected contributions will be used 2009-2011.

The collected contributions will be used for:

The Project 'Ecotechnology for North Namibia' supports the aims of the organisation Green Namibia Eco Centre, particularly regarding renewable energy, finding work for women, production of ecological and economical building materials and ecological construction.

Donate: **Sampo 800019-71260808, ref. 1232**

Contact: **risto.latvala@icon.fi**

The 'Education Project' in Namibia will be continued by maintaining contacts between Namibian and Finnish friendship schools. In South Africa, the Amakhaya Home for street children is being supported.

Donate: **Sampo 800028-10626225, ref, 1232**

Contact: **helena.risto.kekkonen@kolumbus.fi**

In the Project 'Solar Electricity for Benin', jungle villages in Benin will be electrified by solar electricity in cooperation with a local women's organisation Nonvikpokpo.

Donate: **Sampo 800014-70889099, ref. 1232**

Contact: **miabungers@kolumbus.fi**

The Project 'Teach girls – you teach the whole family' promotes the basic education and possibilities of further education for the girls in Mogadishu, Somalia, and thus improves living conditions, health care, equality and human rights.

BECOME A MEMBER

As a member of TEP you get:

- TEP Newsletters 3 to 4 times a year
- Opportunity to participate in TEP activities in your fields of interest
- Opportunity to influence the TEP activities for
⇒ promoting environmentally friendly technologies and the sustainable way of life
⇒ carrying out sustainable development cooperation
⇒ promoting peace and disarmament
⇒ maintaining discussion in the ethics of technology

MEMBERSHIP FEES 2009:

Regular member	25 €
Student, unemployed	10 €
Supporting member	200 €

BANK ACCOUNT:

Membership fees to: Sampo 800011-1472349

(When paying, in the message give in your name, address and email address. Also add a mentioning 'New member'.)
